May 22, 2015

Field Trip Information

Our field trip to Fair Oaks Farm is quickly approaching.

We will need to leave the school as quickly as possible

on the morning of Thursday, May 28. Please

ensure your child's timely arrival to school on this

day. We hope to leave at approximately 8:15. Also, if

your child indicated they would be bringing a lunch

from home, please be sure to send a lunch to school

with your child on this day. Please pack items in

containers that can be disposed of after eating, in

order to ensure less mess once students are finished.

Weekly Update

Can you believe we are so close to the end of the 2014-2015 school year?

This school year has been an amazing experience for me and I could not be more grateful for the students that are in our classroom. Each one of them has truly touched my heart and will forever hold a special place there!

Even though we are nearing the end of the school year, we still have been working hard and learning new concepts in third grade! Our reading time

has focused on plants, as this is a science standard in third grade. In math, we have been very busy in a geometry unit. This week we learned

about different geometric terms, like point, line, line segment, ray, angle, and polygon. We took a closer look at polygons specifically and some of the special names for polygons based on the number of sides the polygon has,

including triangles, quadrilaterals, pentagons, hexagons, octagons, and decagons. We will investigate special names for triangles and quadrilaterals

next week!
